## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-14, drawn to a semiconductor device, classified in class 257, subclass 738.
  - II. Claims 15-28, drawn to a method of making a semiconductor device, classified in class 438, subclass 613.
2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product of claim 1, can be made such that an insulating material completely occupies the gaps that would be created when the device is connected to the carrier, hence rendering unnecessary (when making the device of claim 1) the step of filling the gaps between the carrier and the device with an insulating material, as recited, for example, in claim 15. In another words, the device of claim 1 can be made without the step of “filling gaps between said carrier and said device with an insulating material”.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2891

4. Applicant(s) is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
